** ALGERIA. 13639.998+, Nov 18 at 2009 into UTwente, Arabic S9+10/15, listed as Béchar site of TDA on 13640, but insufficient direct. We really miss 17600 which in A24 ran very long hours, but now in B24 only in local mornings until when? HFCC has exaggerated registrations one hour at a time even if no difference from one to another, including now 13640, and where nothing heard, 13790 and 17600 (Glenn Hauser, OK, WOR)

** CHINA. 7430.068 approx., Nov 18 at 2317, strangely strong S9+30 Khmer direct; it`s CRI via Nanning site, 100 kW at 200 degrees. Must be grayline shortpath if not longpath. 2354 checking Hanoi SDR when measured once calibration adjusted against 10000, rather weak until 2357*. Probably too close to Nanning, 323 km, but good skip distance 1302 km to Phnom Penh. Nanning to Enid: 12879 km = 8 kilomiles (Glenn Hauser, OK, WOR)

** CHINA. 13020, Nov 19 at 2310, S9+10/20 of Chinese with flutter, CNR1 jammer. Longtime since I have fully tuned OOB ranges for these; then JBA carriers very likely more of same, on: 13530, 14920, 14980, 15970, 16100 (Glenn Hauser, OK, WOR)

** CUBA. 570, Nov 20 at 0736 UT tuneby, RR in Morse code under US pileup - all I need to hear to know it`s R. Reloj. WRTH shows CMEA, 25 kW at Santa Clara. The other side:

Living between "light-ups": the consequences of the electricity system disaster for Cubans --- 'There's no chicken in Santiago de Cuba,' complains a mother of three. 'The MSMEs were the ones that had it, despite the price cap, but they rotted, due to the blackouts'
Laura Sarmiento Pérez, Santiago de Cuba 19 Nov 2024 - 20:06 CET

A line to buy gas in Santiago de Cuba. Diario de Cuba [caption]

Santiago de Cuba residents have to make the most of the few hours of electricity they have. In general, the collapse of the National Electroenergetic System (SEN) keeps the entire island in a state of aggravated anxiety due to the lack of credibility of statements issued by the country's leaders.

For the people of Santiago, it is crucial to make the most of the scheduled "light-ups," which range from four to six hours a day.

"I don't understand why, if Hurricane Rafael passed through the west, electricity goes out all across country," says Abel, a retired English teacher. "When Oscar hit Guantánamo, the SEN didn't fail. Obviously, the system is not well balanced. It is shit. Like everything that remains in Cuba, it's broken. They should just leave us with the sunlight, because every day we use less electricity. "...``
https://diariodecuba.com/cuba/1732043186_58421.html
(Glenn Hauser, OK, WOR)

** CUBA [and non]. 1040 kHz, Nov 18 at 0726 UT, whooper/wobbler audible under WHO, presumably only one listed, defective 10 kW R. Mayabeque, Güines (Glenn Hauser, OK, WOR)

** CUBA. 9565, Nov 15 at 0733, weak pulse jamming. Despite all the problems, such as hardly any RHC or Rebelde, the DentroCuban Jamming Command manages to get back on air to jam against nothing, a Radio Martí frequency never overnight, currently scheduled 2100-0100 only per EiBi. The other side:

``China shows that, in Cuba, the 'blockade' is internal --- While Chinese trade with Latin America has been constantly on the rise, with

the island it has been a resounding failure.
Rafaela Cruz La Habana 04 Nov 2024 - 17:12 CET

In September, the Cuban Government closed the "Chinese Costco" in Havana, an establishment like the thousands that can be found in any country and that had managed, to its customers' surprise and joy, to open its doors in Cuba to sell everything that the Chinese sell wherever they go, from hardware to miscellaneous goods, textiles, shoes and food.

The closure of China Import - its real name - was ordered because inspectors "discovered" that dollars were traded there, taxes were evaded, and undocumented workers were hired; that is, the same things being done in private businesses all across the country, as it is the only way for them to survive the legal and fiscal morass to which Castroism subjects them...``
https://diariodecuba.com/economia/1730736739_58142.html
(Glenn Hauser, OK, WOR)

** FRANCE. 9690-9695-9700, Nov 15 at 0732, DRM noise at S7. EiBi shows an irregular test this hour from TDF in French to W Africa (Glenn Hauser, OK, WOR)

** JAPAN. 28555 USB, Nov 19 at 2132, JG1OUT Tokyo contacting Brasil, USA stations. QRZ.com: ``JG1OUT Japan flag Japan, MITSUYA "MAC" TAMAKI, 1900-11 Oninosensui Kanbara Tsumagoi Village, Agatsuma-gun Gunma 377-1402, Japan`` (Glenn Hauser, OK, WOR)

** MADAGASCAR. 11965, Nov 15 at 2043, English, African Pathways with addresses in USA and elsewhere, S7-S9 direct, MWV best signal on band from overseas while hardly anything beyond North America on 11, 13, 15 or 17 MHz bands (Glenn Hauser, OK, WOR)

** MADAGASCAR. 13709.949, Nov 18 at 2006, algo JBA S7 into UTwente, MWV per HFCC in Arabic, 100 kW at 355 degrees, so way off-frequency (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 7475, Nov 19 at 0751, undermodulated Josiah voice is JBA at S8, so his Station YHWH, anti-Christ pirate, is on very late. Of course that`s still before local midnight PST. Someones usually report him on and off earlier every night, but not this date (Glenn Hauser, OK, WOR)

** PHILIPPINES. 11645, Nov 15 at 2258, S9+10/20 tone, before BBCWS hour via USAGM Tinang, as briefly confirmed after 2300. Far too much is happening at 23-24 UT, not only on SW, but network and local TV news! (Glenn Hauser, OK, WOR)

** SPAIN. 17755, Nov 15 at 1916, no signal into UTwente from REE 161-degree frequency for Africa, while the other three are well audible: 17715, 12030, 9690. HFCC shows one alternative registration to 17755: 21620 but at 20-24 M-F, 16-20 S/S: but nothing there at 2111 check Fri Nov 16.

Does not fail to air token English Fri Nov 15 at 2300, same 3 frequencies as above; 9690 is VG S9+20/30 direct. ToH music keeps running thru the timesignal but soon s/on English. Preview feature to be about the volcanic eruption 3+ years ago in La Palma, Canary islands, a documentary film has been made about it. 2302 news starting with aftermath of the Valencia floods. 2309 ending commentary about *rump and ME policy, apparently by the Lebanon correspondentess. 2310 the volcano story (Glenn Hauser, OK, WOR)

** SPAIN. 17755, Nov 16 at 2304, no English since it`s Saturday, but REE still absent from this frequency direct, but audible on 17715,

12030 and best 9690. Something`s notright at Noblejas (Glenn Hauser, OK, WOR)

** SPAIN. 12030, Nov 17 at 1942, this REE frequency for ME is OFF, no signal into UTwente or Maryland SDR, as still is off 17755 for Africa. Still on are 17715 for S America, 9690 VG for N America. Something`s notright at Noblejas (Glenn Hauser, OK, WOR)

** SPAIN. 9690, Mon Nov 18 at 2300, token English from SNR not off the air, S9+20/30 direct and even sufficient on PL-660 with telescopic, also audible on 12030, 17715, not 17755. Preview a festival in London. 2303 news leads with protests against corruption, 2306 about Cervantes award. 2311 contact info including email which has not replied yet to my inquiry on anomalies. 2312 interview about a festival starting Nov 20 in London of queer literature, not only in Spanish, but also Catalan, Basque, Galician. That`s rather specialized. Google translate is no help with ``queer`` into Spanish with the same neutral or even positive connotation as in enlightened English (Glenn Hauser, OK, WOR)

** SPAIN. 9690, Wed Nov 20 at 2256, the NAm frequency of REE is OFF again! No signal direct nor into Maryland SDR. Something`s notright at Noblejas. 17715 on, 17755 still off; and 12030 backwards for ME is sufficient, S8/9+10. Preview about an exhibition inside a ship in Madrid. 2302 news leading with child poverty high in Spain. 2307 `Titanic` song, exhib until Jan 5 is immersive experience, as if inside that ship, interview about. Really too much of their token English is devoted to exhibitions rather than more important current events; but interviewing exhibitors is a lot easier, and safer? (Glenn Hauser, OK, WOR)

** TURKEY. 5959.993+, Fri Nov 15 at 2259, VOT IS and English ID, S9+10/20 direct but insufficient vs local S9+10 noise level. S9+35/40 at 2339 into UTwente when measured, unusually offset-minus, `That`s Why` with Efsun the axentuated, something about ``bank knots``; music. 2350 multi-lingual ID filler reel. 2352 s/off as if it`s the 1330 on 13635: something`s always awry at Ankara. And IS, restarting at 2356 with German IDs: something`s always erroneous at Emirler. Did not catch chopoff time as I hastened to other station frequencies (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 5960.003+, Nov 16 at 2303, VOT English not off the air, S9+10 direct but insufficient vs noise level. At 2326 into UTwente when measured, S9+25/30, `The Energy Agenda` ending at 2329, ``always-by-your-side`` promo, 2330 music. 2351 recheck, headlines by Efsun about Gaza, 2352 s/off as if 13635 at 1330, something`s always awry at Ankara, and IS very briefly to 2353*, uncovering the CCCCCCI which was already audible underneath; something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 9610, Sun Nov 18 at 2130, JBA signal into UTwente, maybe VOT English which is normally sufficient off the back; propagation degraded. So not a chance to hear `Letterbox` yet.

5960.003+, Sun Nov 18 at 2259, VOT English, S9+10/20 into UK SDR I have running to check 3975, s/on as if 1330 on 13635. Then over to UTwente where measured, S9+20/30 with humroar and 6CI as Efsun the axentuated reads the olds, and sports until 2317 `Weekly Analysis` about increased Zionist influence on the *rump admn, ``penned`` by John somebody - quill, fountain or ballpoint? 2322 ``always-by-your-side`` promo, music. 2328 ``a-b-y-s`` again! and `Letterbox` with Efsun so hard to understand despite her careful attempts to read from a script. 1) perennial Jayanta Chakroborty, New Delhi, logged 11/9 on 7285. 2) Rimantas? asks if they plan to use DRM? Not now but maybe. 3) Canada, heard 45444. 4) Kouji ---, Japan.

Turkish music pause. 5) ``finally`` Paul? from S Australia who listens to Chinese. 2335 more music. 2341 ``turning to a topic``, lifelong-learning such as by listening to VOT. 2345 `L`box` outro. 2346 ``with-you-every-hour`` promo, music. 2351 headlines. 2353 s/off as if the 1330 on 13635: something`s always awry at Ankara, and IS briefly to 2354* uncovering the 6CI (Glenn Hauser, OK, WOR)

** TURKEY. 5960, Mon Nov 18 at 2258 past 2315 several chex direct, no signal from VOT English, but algo on 9610, the 2130 broadcast overrunning? Can`t recognize anything in JBA signal. 2327 into UTwente, no TRT, just Chinese on 5960 and presumed Mongolian on 9610. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY. 5960, Nov 19 at 2257, VOT not off the air, IS and English IDs, S9+10 direct = noise level so not monitored further (Glenn Hauser, OK, WOR)

** TURKEY. 5960.016-, Nov 20 at 2256, VOT not off the air, only S9+5 direct = hi noise level; but into UTwente where measured, S9+30/35 and only a bit of the 6CI JBA under. After olds, 2312 `Unexpected Twists of Fate` about invention of safety pin, voiced by Efsun so can`t really follow the details, until 2322, right into `The Middle East and Turkey`, about how relations may change with *rump resuming; by an ``international relations expert`` whose name I cannot possibly copy. 2327 music, 2335 `Sports Panorama`. 2341 or so music. 2353 s/off as if 1330 on 13635: something`s always awry at Ankara. 2354 fragment of IS for a few sex, off* uncovering the CCCCCCI which becomes merely CCCCI. No finesse, something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** U S A. 379 MCW kHz, Nov 18 at 0552 UT, DL, 50-Watt ND beacon at DuLuth MN, ``Pykla`` nickname per RNA list. Last logged Feb 4, 2024 and definitely not RU on 379 in Arkansas. PyKla is also a Python user group in Kampala, of course (Glenn Hauser, OK, WOR)

** U S A. 420 MCW kHz, Nov 17 at 0730 UT, FQ, 25-watt ND beacon at Fairmont MN is JBA as are some of the other fringe regulars lower, still fighting hi local noise level, so it seems I never hear a new one. Distance is 533 miles, so 21.32 miles per watt, or 0.047 watt per mile (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2268 monitoring: confirmed Thursday November 14 at 1730 on SW Radio, Germany, 3975.001-, S8/S9 into UTwente.

WORLD OF RADIO 2269 contents: (Armenia), Australia, Azores, Brasil, (Bulgaria), China, Cuba, Denmark, Eritrea non, Finland, France, (Germany), Korea North and non, Kurdistan non, Libya, (Luxembourg), (Madeira), México, Myanmar non, Netherlands, North America, Perú, (Philippines), Solomon Islands, Spain non, (Taiwan), Tibet, Turkey, (UAE), UK and non, USA and non, Vanuatu; propagation outlook - (countries mentioned along with others not in order)

** U S A [and non]. WORLD OF RADIO 2269 monitoring: confirmed first
SWBC, Friday November 15 at 1320 the 1300 on WRMI 15770, S5/S8
direct.
[typo in previous report: SWR Germany on 3975 of course, not 2975!]

Also confirmed Friday November 15 at 2158 the 2130 on IRRS SW via AM
Italia, 1322.997 at S8.

Also confirmed Friday November 15 at 2303 the 2300 on WRMI 9955, JBA
direct. At 2328 into Georgia SDR, S9+20/35.

Also confirmed Friday November 15 at 2357 the 2330 on SW Radio,
Germany, 3975 into UTwente. Next:

0400 UT Saturday WTWW 5085;
0930 UT Saturday WRMI 9455 to WNW [has been off air; 7730 instead?];
1530 UT Saturday SW Radio, Germany 6160;
1830 UT Saturday SW Radio, Germany 3975;
2030vUT Saturday WA0RCR 1860-AM [2000/2200];
0000 UT Sunday WTWW 9475 [suspended];
0100 UT Sunday WRMI 9955 to SSE [also web-, phonecast; jammed?];
0330vUT Sunday WA0RCR 1860-AM [nominal 0415; as late as 0600];
2000 UT Sunday IRRS 1323-Italy;
2230 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW [or 7780, last 3 weeks];
0030 UT Monday WRMI 7780 to SW;
0400vUT Monday WBCQ Area 51 6160v to WSW;
0930 UT Monday SW Radio, Germany 6160;
2030 UT Monday SW Radio, Germany 3975;
0330 UT Tuesday WRMI 7780 to SW;
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];

1500 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2100 UT Tuesday IRRS 1323-Italy;
0030 UT Wednesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2200 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2269 monitoring: confirmed UT Saturday November 16 at 0400-0429 on WTWW-2 5085, VG direct, a bit of music afterwards to 0430*.

Not confirmed Saturday November 16 at 0930 on WRMI 9455, which remains off he air. But someone suggested that 9455 programming may be appearing on 7730 instead. So I asked the WOR iog: ``WOR on which WRMI at 0930? Scheduled on 9455 but has been off the air. One report that some of that programming has been moved to 7730. If awake and not inconvenient, would someones please check if World of Radio airs then on either frequency? Thanks, Glenn`` and got two contradictory replies:

At 0935, Chris Mackerell, New Zealand: ``9455 off-air, 7730 sounds like SMTV. No WOR to be heard. Cheers, Chris``

But Ron Howard, California, at 0940: ``Glenn, Nov 16 (Sat.) heard 7730, with non-stop music 0926-0930 UT; at 0930, start of WOR of #2269; weaker QRM underneath in Chinese (CNR1 jamming?); WRMI much stronger via remote SDR in Vermont. 9455 kHz was a clear frequency. Ron, San Francisco, CA``

I happened to awaken at 0930 and heard nothing direct but Chinese on 7730 - that would be jamming vs SOH per EiBi. Yet Ron was hearing WOR -- so that leaves me still wondering. A possible explanation, however unlikely, would be that WRMI was running two transmitters at same time on 7730 with different programming, widely divergent azimuths, deliberately or by mistake? Per grid, SMTV is supposedly only on 9395 at the 09-10 hour. 7730 supposedly with TOMBS at least on weekends. Glenn.

Confirmed Saturday November 16 at 1547 the 1530 on SW Radio, Germany, 6160.002-, S9+5/15 into UTwente. Some ACI from 6165 which EiBi shows is CRI in Pashto via Urumqi, yet some background music sounded similar to ``Silent Night``.

Also confirmed Saturday November 16 at 1834 the 1830 on SW Radio, Germany, 3975.002+, S9/+5 into UTwente.

Also confirmed Saturday November 16 at 2030 on WRN North America stream, and on WRMI webcast only.

Also confirmed Saturday November 16 from 2059 the 2030v on WA0RCR, 1860 AM, MO, S9+18/20 groundwave into nearby SDR.

Also confirmed Saturday November 16 at 2100 on WRN Europe stream.
Next:

0000 UT Sunday WTWW 9475 [suspended; still not on air];
0100 UT Sunday WRMI 9955 to SSE [also web-, phonecast; jammed?];
0330vUT Sunday WA0RCR 1860-AM [nominal 0415; as late as 0600];
2000 UT Sunday IRRS 1323-Italy;
2230 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW [or 7780, last 3 weeks];
0030 UT Monday WRMI 7780 to SW;

0400vUT Monday WBCQ Area 51 6160v to WSW;

2030 UT Wednesday SW Radio, Germany 3975;
2200 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2269 monitoring: confirmed UT Sunday November 17 at 0100 on WRMI 9955, S7/9+5 into Bonaire SDR.

Also confirmed UT Sunday November 17 from 0446 the 0415v on WA0RCR, 1860 AM, MO, VG into nearby SDR.

Not confirmed Sunday November 17 at 1145 when I happen to awaken, the 1130 on WRMI 9955: JBA signal direct, someone talking? Can`t be sure it be I. Earlier I requested on the WOR iog:

``If already awake and not inconvenient, could someones check what`s on WRMI Sunday at 1130 UT. Supposedly 9955 is on air at least on weekends at this hour. If you don`t hear WOR direct or via remote, what`s on the stream? Thanks, Glenn`` -- Replies:

Yogi Miaow: ``WOR 2269 was on 9955 at 1130 UT, so was their live audio stream. (I heard it on a remote in Alberta .ca)``

``Hello Glenn, WOR edition No. 2269 is heard in Live streaming of WRMI just now Sunday from 1130 UTC which was preceded by Wavescan at {until} 1130 UTC. Jose Jacob, India``

``Nov 17 (Sunday) heard WOR via WRMI on 9955 kHz; tuned in from 1133+ UT; fair via Vermont remote SDR. {Also WRMI on 7730 at 0930 UT, with "Wave Scan" with poor-fair reception via same remote.) Ron Howard, San Francisco, CA``.

Nov 17 at 1935 checking prior to 2000 WOR on 1323 via AM Italia, UTwente is again getting pulsing QRM from 1321.0, at the rate of 5 per second. Not heard on other SDRs in Netherlands, Germany. Next:

2000 UT Sunday IRRS 1323-Italy;
2230 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 7570 to NW [or 7780, last 3 weeks];
0030 UT Monday WRMI 7780 to SW;
0400vUT Monday WBCQ Area 51 6160v to WSW;
0930 UT Monday SW Radio, Germany 6160;
2030 UT Monday SW Radio, Germany 3975;
0330 UT Tuesday WRMI 7780 to SW;
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
1500 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2100 UT Tuesday IRRS 1323-Italy;
0030 UT Wednesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2200 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2269 monitoring: Confirmed Sunday November 17 at 2000 on IRRS SW via AM Italia, 1322.998- kHz, S8/S9 into UTwente with 5/second beepery ACI from 1321 - a local problem? Not audible on other SDRs in Netherlands, Germany.

Also confirmed Sunday November 17 at 2158 the 2130 on SW Radio, Germany, JBA into UK SDR as not making it to UTwente, too close in degraded prop.

Also confirmed Sunday November 17 at 2330 on WRMI 7780 instead of still silent 7570 for the fourth week, S6/S8 into Maryland SDR but at 2337, S9+5/10 into S Texas SDR.

Also confirmed UT Monday November 18 at 0030, on WRMI 7780, S9+10/20 into S Texas SDR.

Also confirmed UT Monday November 18 at 0402 the 0400 on Area 51 via WBCQ, 6160 -70 Hz = 6159.930, S7/S8 into NH SDR.

Also confirmed Monday November 18 at 2030 on SW Radio, Germany, 3975, S7/S9 into EI6IZ Ireland SDR, after JBA at UTwente: propagation, or something wrong there? Next:

0330 UT Tuesday WRMI 7780 to SW;
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
1500 UT Tuesday WRMI 9955 to SSE [also web-, phonecast; jammed?];
2100 UT Tuesday IRRS 1323-Italy;
0030 UT Wednesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2200 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2269 monitoring: NOT confirmed UT Tuesday November 19 at 0330 on WRMI 7780 - since it`s OFF THE AIR. Hope not another protracted absence like 7570 & 9455. 7780 still off at 0752 check while 7730 remains audible.

Confirmed Tuesday November 19 at 1405 the 1400 on WRMI 9955, S9+15/20 direct with occasional ``blaap`` QRM, ute I guess rather than jam.

Also confirmed Tuesday November 19 at 1510 the 1500 on WRMI 9955, JBA undermodulated.

Also confirmed Tuesday November 19 at 2100 UT on IRRS SW via AM Italia, 1322.997+, VP S7 into UTwente - not at 2000 as I had listed. Next:

0030 UT Wednesday WRMI 9395 to NNW;
0030 UT Wednesday SW Radio, Germany 3975;
2030 UT Wednesday SW Radio, Germany 3975;
2200 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2269 monitoring: ``From: Richard Lemke, St. Albert, Alberta, Canada, the desk of Richard's listening Post, Radio: JRC NRD-535 HF, Antenna: random long wires in the trees. Hello Glenn: WRMI, World of Radio #2269, 9395 kHz, static QRN, 0045 ID heard, 0032, 0044, 0057 (55433-4), 0059, November 20 UTC 2024 [Wed] (Lemke, Richard -AB)``

Confirmed UT Wednesday November 20 at 0030 on WRMI 9395, S9+30 into MO SDR.

Also confirmed UT Wednesday November 20 at 0030 on SW Radio, Germany, 3975.002+, S8/S9 into UTwente.

Also confirmed Wednesday November 20 at 2030 on SW Radio, Germany, 3975.003–, S9/+15 into UTwente.

Also confirmed Wednesday November 20 at 2200 on WBCQ, 7490 –62 Hz = 7489.938, S9+5/20 into Maryland SDR. Next:

0130 UT Thursday WRMI 5010 to S {confirmed};
1730 UT Thursday SW Radio, Germany 3975.

Glenn Hauser, P O Box 1684, Enid OK 73702
(Glenn Hauser, OK, WOR)

** U S A. 5920, Nov 16 at 0728, huge S9+45/50 direct with soft instrumental hymns; and still at next awaken 0933. Obviously WTWW–1 has been prolonged way late, but not with TOMBS, which is all it usually carries earlier in evening, and daytimes on 9930. A test? I`ve asked George what`s going on with this (Glenn Hauser, OK, WOR)
{he forgot to turn off the transmitter}

** U S A. 5920, Nov 17 at 0603, WTWW–1 is off, probably much earlier, unlike last night when was still on at 0933. Day frequency 9930 not on by 1715, but is by next check 1800 (Glenn Hauser, OK, WOR)

** U S A. 9847, Nov 20 at 1910, huge dirty blob signal centered about here as WTWW–2 is acting up, totally unreadable noise, while proper frequency 9930 is OK but much weaker than usual; until 1913* as I am checking these out for George who says the xmtr readings are going haywire. A few minutes later, back on and back to normal, TOMBS with big clear signal on 9930 only (Glenn Hauser, OK, WOR)

** U S A [and non]. 7490 –50 Hz = 7489.950, UT Sat Nov 16 at 0052, pre-`AAAWWW` check of WBCQs, this one still S5/S7 offset less than usual, with FKB. And with ACI from 7495 not evitable even by LSB tuning, i.e. VOA R. Ashna via Kuwait until 0100. 3265+ and 5130– not on air into NH SDR, nor later mid-hour check direct. 6160 with TOMBS –71 Hz = 6159.929, S8/9+10. Tried the 7490 stream but not working. So I switch to Maryland SDR on 7490, where it`s S9/+10. After FKB, deadair, Chariots of Fire music bit, canned ID thrice, more DA, finally JIP Wm Tell Overture theme. Allan remarks over/under music, ``things much better``. Then refers to ``Elon Musk, our hero``, just like last week, so a repeat? No, this seems live when it`s clear that the MAGAtts will control all branches of government. More delusional gloating for sure, so I quit (Glenn Hauser, OK, WOR)

** U S A. (7490), Nov 19 at 2006, the expanded Tuesday-only 2-hour edition of `Pirate Joe Extravaganzo` is underway via WBCQ webcast with his usual low-key anti-MAGA political ruminations.

Checking since this report in NRC DX News Nov 26 published Nov 19:
``950 WHVW NY Hyde Park – Silent Nov. 1, financial problems and transmitter needs fixing.``

This is JP Ferraro`s station; had been simulcasting on WBCQ 7490 as `Pirate Joe Extravaganzo` M-F at 21-22 UT, additional 20-21 on

Tuesdays - is he still doing that on WBCQ only? Has he said anything about WHVW situation? (Glenn Hauser, OK, WOR)

** U S A. 7489.938, Nov 20 tuning WBCQ in early before WOR, music during Pirate Joe`s `Extravaganzo`, but at 2159 closing he mentions WHVW-FM and WBCQ. So I guess it`s WHVW(AM) only that is out of service. It was on 950, while there is no WHVW-FM in WTFDA FMDB. Instead it`s a mere translator as per NRC AM Log, W243EI on 96.5, Hyde Park NY. The AM was only 500/57 watts. But, but operating a `translator` with nothing to relay is not yet? kosher (Glenn Hauser, OK, WOR)

** U S A. 9955, Nov 18 at 1628, JBA signal surely WRMI. Current skedgrid for System B shows until 1630*, then internet-only until *2200 (Glenn Hauser, OK, WOR)

** U S A. 7780, Nov 20 at 0736, this WRMI is back on air, after missing yesterday from at least 0330 when WOR should have aired (Glenn Hauser, OK, WOR)

** U S A. 17525, Nov 14 at 1733, no signal from WMLK into UTwente; scheduled 1730-2230 and had been reliable. At 0725 Nov 14, Zacharias Liangas said, ``Yesterday 17525 was vacant in the 18z time. They seem they stopped this transmission? I will try again the next days``. But by 1801 recheck it`s on 17524.987+, S9+10/20 into UTwente (Glenn Hauser, OK, WOR)

** U S A. 4840, UT Sun Nov 17 at 0415, WWCR-4 like last week, unID preacher with horribly off-key amateur hymnody, so the 4-year-old Australian DX Reports with Bob Padula are still canceled. Dave Kenny of BDXC-UK referred to them so politely as ``archives`` (Glenn Hauser, OK, WOR)

** U S A. 790, Nov 17 at 0733 UT, two mentions of ``wsbw.com`` apparent station promo. In NRC AM Log, must have been WSGW, which is U4 5/1 kW from Saginaw MI. Radio-locator shows day & night patterns both have lobe to the southwest; but address in Tempe AZ, rather inconvenient. Perhaps they found local address as in NRC AM Log too daunting: 1795 Tittabawassee Rd, 48604-9431. ``Like many place names in Michigan, the word Tittabawassee is of Native American origin. The word roughly translates from the Chippewa or Ojibwa language to the “river that follows the shore”. WSBW.com is World Space Business Week (Glenn Hauser, OK, WOR)

** U S A. 1130, Nov 15 at 0803 UT, KLEY Wellington KS music unheard, only KWKH sports talk. Failing to run 250 W day power at night? (Glenn Hauser, OK, WOR)

** U S A. RF 18, virtual 62-5, Nov 16 at 1615 UT, I`m checking for SCRIPPS NEWS [ex-NEWSY], via KOPX Ion OKC -- at first it`s black and silent, then upcomes IONplus, not same as IONplain on 62-1. There were press reports that Scripps was about to abandon over-the-air channels for streaming:

``Scripps cutting 200+ jobs, shutting down Scripps News channel 91.7 WVXU | By John Kiesewetter Published October 2, 2024 at 12:39 PM EDT

Saying that “the prospects for the necessary revenue growth haven’t materialized,” Cincinnati-based E.W. Scripps Co. is pulling the plug on its national 24/7 Scripps News broadcast channel based in Atlanta and eliminating more than 200 jobs.

Adam Symson, Scripps president and CEO, told staffers Friday that the national broadcast programming – seen here on WCPO-TV’s Channel 9.6 –

would end Nov. 15.

However, “it will remain on streaming and digital platforms with weekday live coverage from the field” and a “core reporting team, based primarily in Washington, D.C., will serve Scripps’ local stations’ news operations with national and international journalism,” Symson said in a staff email...``
https://www.wvxu.org/media/2024-10-02/scripps-cutting-jobs-shutting-down-scripps-news-channel

Seems it has now just happened. I was hoping it would provide truly unbiased news coverage, unlike NewsNation which claims to be (Glenn Hauser, Enid, WOR)

Replies on the WTFDA iogroup:
``Hi Glen-and-All: I am also sorry to see Scripps-News quit what they were doing. I heard some of their hosts say good-bye yesterday. I am not sure what KILM 64.1 is running, but I think it`s some entertainment or series. I am listening on this stream of Scripps. Mostly just packaged reports.

https://content.uplynk.com/channel/4bb4901b934c4e029fd4c1abfc766c37.m3u8
I did aircheck them when they were Newsy at a beginning of War in Ukraine, also grabbed DNC-and-RNC coverage, as well as Election night for 25 hours, and a June 27 Debate. Obviously if you want any of these, please write off-list. Chime Hart``

``After seeing your email I checked and it's ION now. Which dupes ION that's on another station here in Quad-Cities Iowa-Illinois. But this week coming up there are major changes coming as one station which is actually licensed to Burlington IA but had has a hopping transmitter before moving to the Orion IL TX site becomes the flagship for 3.0 and a bunch of subchannels gets moved around. I have warned people that they may need to hunt for their favorites till things get settled down. Michael Scheel``

``If you have a Roku, download their app. I'm watching it now. Mike Bugaj, CT`` --- ``Well Mike, I just looked around their ROKU app, it seems they are not running live newscasts. I know they've been saying on-air "Scripps-News is moving to your favorite streaming service" but they were already available. It`s also too bad their youtube channel doesn't have many longform events. Chime`` (via Glenn Hauser, WOR)

UNIDENTIFIED. 12030, Tue Nov 19 at 0748, JBA carrier. Surely not Spain at this hour. EiBi has R. Delta Int`l, Netherlands, at 08-15 Sat & Sun, maybe? It`s registered in HFCC for 07-12 UT daily with 5 kW. Nothing likely to harmonicize from 4010 or 6015 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 16202 USB, Nov 19 at 2313, 2-way in Spanish (Glenn Hauser, OK, WOR)

THE TINY TRAP

Leslie Stahl introducing an otherwise excellent piece about BHUTAN on CBS` 60 MINUTES really a sesquihour, at 0135 UT Nov 18 diminishes it as ``tiny``. Really, the area of Bhutan – as if flat?? is 19,505.263 times the area of MONACO, which really is tiny. Duh.
